Response Attachment 200-135

The assertion that quality assurance issues, etc. are not addressed in the SLS is correct. However, the CLCS project is not being developed in a typical government/contractor relationship in which all requirements need to be levied in the System Level Specification. The issues addressed by the problem statement in this RID are being dealt with in appropriate program management documentation (e.g., Quality Assurance Plan, System Test Plan, Software Development Plan, etc.). Documentation of these issues in the SLS would result in duplication. The RID is therefore rejected.
